

Iowa Strategic Goals Program Assistance Workshop

“Q & A: RICE Rule, Boiler MACT & Stormwater”

Regulations: by law you are required to comply. However, compliance requirements can often seem overwhelming and confusing, and rule changes can catch you completely off guard and leave your head spinning.

Wouldn't it be nice if regulators would provide hints and tips to help you better understand what is required of your business? Would you like the opportunity to meet with regulators and industry experts in a small setting where questions are welcome to learn about the Reciprocating Internal Combustion Engines (RICE) rule, the Boiler Maximum Achievable Control Technology (MACT) ?.

Join us at the Iowa Strategic Goals Program one-day workshop on November 13. Experts from the U.S. Environmental Protection Agency, the Iowa Department of Natural Resources, and the Iowa Waste Reduction Center will be providing compliance assistance on these requirements. This workshop provides an opportunity to access regulators who will answer your questions on these compliance issues.

This workshop is the 14th in a series offered by the Iowa Strategic Goals Program. While open to all Iowa manufacturers, the materials presented will apply to a broad range of industrial processes. The following comments were received from previous workshops:

- “Good information presented – relevant to all types of industries.”
 - “Very good class, good information, timely topics.”
 - “Speakers were very well educated in topics discussed.”
 - “I think this is a great forum to allow businesses to get good compliance information with the regulatory agencies.”
-

Sponsored by the Iowa Strategic Goals Program in partnership with U.S. Environmental Protection Agency's Region 7, the Iowa Department of Natural Resources and the Iowa Waste Reduction Center.
